Kedar Enterprise ERP

Client Role & Workflow Guide

Phase 1 — User Roles, Dashboards & Business Flow

Prepared for client review and UAT

1. Introduction

Kedar Enterprise ERP is a web-based system for managing manufacturing, inventory, sales, GST billing, payments, and delivery. Each user logs in with a role that controls which screens and actions they can access. This guide explains login credentials, what each role sees on the dashboard, daily responsibilities, and the end-to-end business flow.

Default password for all demo accounts: admin123

2. Login Credentials

Role	Name	Email	Password
Owner	Admin User	admin@kedarenterprise.com	admin123
Manager	Rajesh Manager	manager@kedarenterprise.com	admin123
Accountant	Priya Accountant	accountant@kedarenterprise.com	admin123
Warehouse	Suresh Warehouse	warehouse@kedarenterprise.com	admin123
Sales	Amit Sales	sales@kedarenterprise.com	admin123

3. Module Access Summary

Module	Owner	Manager	Accountant	Warehouse	Sales
Dashboard	Full	Full	Sales focus	Warehouse layout	Sales focus
Manufacturing	Read & Write	Read & Write	—	Read & Write	—
Inventory	Read & Write	Read & Write	—	Read & Write	—
Delivery	Read & Write	Read & Write	—	Read & Write	—
Sales & Billing	Read & Write	Read & Write	Read & Write	—	Read & Write*
Customers	Read & Write	Read & Write	Read & Write	—	Read & Write
Payments	Read & Write	Read & Write	Read & Write	—	—
Products	Read & Write	Read & Write	View only	View only	View only
Users & Roles	Read & Write	—	—	—	—

* Sales can create orders but cannot confirm them or generate invoices.

4. End-to-End Business Flow

A typical order moves through the system in this sequence:

1. Warehouse records production !’ stock increases in Inventory.
2. Sales creates a DRAFT sales order for a customer.
3. Accountant (or Manager/Owner) confirms the order !’ GST invoice is generated and stock is deducted.
4. Warehouse creates delivery challan !’ dispatches !’ marks delivered.
5. Accountant records customer payment against outstanding balance.
6. Manager / Owner reviews dashboard, KPIs, and notifications.

Step	Who	What happens
1	Warehouse	Production entry logged; stock updated
2	Sales	Draft order created with customer & products
3	Accountant	Order confirmed; invoice & PDF generated
4	Warehouse	Challan created !’ dispatched !’ delivered
5	Accountant	Payment recorded; balance reduced
6	Manager / Owner	Review reports, tasks, and alerts

Important system rules

- Only Owner, Manager, and Accountant can confirm orders and generate invoices.
- Sales team creates draft orders only — confirmation is done by Accountant.
- Customer phone number cannot be changed after the customer is created.
- System blocks order confirmation if it exceeds the customer's credit limit.
- Non-Owner roles (except Admin) auto-logout after 30 minutes of inactivity.

Owner — Admin User

Login

Email: admin@kedarenterprise.com

Password: admin123

Purpose

Full business control — all operations plus user and role administration.

Modules in sidebar

Dashboard · Manufacturing · Inventory · Delivery · Sales & Billing · Customers · Payments · Products · Users & Roles

Dashboard — what you see & do

- Welcome banner with your name and full business overview subtitle.
- My Tasks — challans pending, draft orders, low stock, outstanding collections (clickable cards).
- KPI tiles: Today's Production, Today's Sales, Monthly Revenue, Outstanding, Low Stock, Deliveries.
- Invoices ready for challan list and draft sales orders (when applicable).
- 7-day sales trend chart and best-selling products chart.
- Low stock alerts panel and recent activity feed.
- Quick Actions — shortcuts to every module you can access.

What you can do

- Record production and manage inventory adjustments.
- Create, confirm, and invoice sales orders; download GST invoice PDFs.
- Manage customers, record payments, and track outstanding balances.
- Create delivery challans, dispatch, and mark deliveries complete.
- Add/edit products and manage the product catalogue.
- Add users, assign roles, activate/deactivate users, reset passwords.
- View and manage notifications from the bell icon.

What you cannot do

- Nothing is restricted — full system access.

Typical daily workflow

1. Review dashboard KPIs and My Tasks each morning.
2. Handle any pending confirmations, collections, or user requests.
3. Monitor monthly revenue, outstanding dues, and operational alerts.

Manager — Rajesh Manager

Login

Email: manager@kedarenterprise.com

Password: admin123

Purpose

Run day-to-day operations across production, inventory, sales, billing, payments, and delivery — without user administration.

Modules in sidebar

Dashboard · Manufacturing · Inventory · Delivery · Sales & Billing · Customers · Payments · Products

Dashboard — what you see & do

- Full operational overview — same KPIs as Owner (except user admin).
- My Tasks: create challan, dispatch pending, confirm draft orders, low stock, collections.
- Sales trend chart, best sellers, draft orders, invoices awaiting challan.
- Low stock alerts and recent activity across modules.
- Quick Actions for all operational modules.

What you can do

- Record production entries and stock adjustments.
- Create and confirm sales orders; generate GST invoices.
- Manage customers and record customer payments.
- Handle full delivery cycle: challan !’ dispatch !’ delivered.
- Add and edit products in the catalogue.

What you cannot do

- Users & Roles module (no access to add or manage users).

Typical daily workflow

1. Check dashboard for pending tasks and draft orders.
2. Confirm sales orders if Accountant is unavailable.
3. Monitor low stock and coordinate with Warehouse on production.
4. Review monthly revenue and outstanding collections.

Accountant — Priya Accountant

Login

Email: accountant@kedarenterprise.com

Password: admin123

Purpose

Commercial operations — sales confirmation, GST invoicing, customer ledgers, and payment collection.

Modules in sidebar

Dashboard · Sales & Billing · Customers · Payments · Products (view only)

Dashboard — what you see & do

- Subtitle: "Orders to confirm, invoices, and collections".
- My Tasks: Confirm draft orders (high priority), outstanding collections.
- KPI tiles: Today's Sales, Monthly Revenue, Draft Orders count, Outstanding balance.
- Draft Sales Orders list — click to go to Sales & Billing for confirmation.
- Recent activity for sales, payments, and customers.
- Quick Actions: confirm orders, record payments, add customers.

What you can do

- Confirm DRAFT sales orders and generate GST invoices (stock deducted automatically).
- Download invoice PDFs for records and customer sharing.
- Add and edit customers; manage credit limits.
- Record payments (Cash, UPI, Bank Transfer, Cheque) against customer balances.
- View product catalogue (read-only) when creating or reviewing orders.

What you cannot do

- Manufacturing, Inventory, and Delivery — no access.
- Users & Roles — no access.
- Cannot create production entries or dispatch goods.

Typical daily workflow

1. Log in !’ check dashboard for draft orders awaiting confirmation.
2. Go to Sales & Billing !’ Confirm & Invoice on each DRAFT order.
3. If credit limit error appears, adjust order or update customer credit limit.
4. Record customer payments in Payments module.
5. Download invoice PDFs; Warehouse is notified to create delivery challan.

Warehouse — Suresh Warehouse

Login

Email: warehouse@kedarenterprise.com

Password: admin123

Purpose

Production, stock control, and physical dispatch of goods.

Modules in sidebar

Dashboard · Manufacturing · Inventory · Delivery · Products (view only)

Dashboard — what you see & do

- Dedicated Warehouse layout — "Your dispatch queue, stock alerts, and production tasks".
- Four KPI tiles: Today's Production, Low Stock, Awaiting Challan, To Dispatch.
- Dispatch actions panel — task cards for challan, dispatch, and delivery completion.
- Invoices ready for challan list with customer name and amount.
- Low stock alerts and recent production/delivery activity.
- Quick Actions: Production Entry, Stock Check, Create Challan.

What you can do

- Create production entries (product, batch no, date, qty) — stock increases automatically.
- View stock levels; perform stock adjustments (damage, recounts, corrections).
- Create delivery challan from confirmed invoice (vehicle & driver details).
- Dispatch challan when vehicle leaves; mark delivered when goods reach customer.
- View products (read-only) for production reference.

What you cannot do

- Sales & Billing — cannot create or confirm orders.
- Customers and Payments — no access.
- Users & Roles — no access.

Typical daily workflow

1. Morning: record production entries in Manufacturing.
2. Check Inventory for low-stock items.
3. When Accountant confirms orders !’ dashboard shows invoices awaiting challan.
4. Delivery !’ New Challan !’ select invoice !’ Dispatch !’ Mark Delivered.

Sales — Amit Sales

Login

Email: sales@kedarenterprise.com

Password: admin123

Purpose

Customer-facing sales — create orders and manage customer master data.

Modules in sidebar

Dashboard · Sales & Billing · Customers · Products (view only)

Dashboard — what you see & do

- Subtitle: "Your orders, customers, and sales pipeline".
- My Tasks: draft orders awaiting accountant confirmation.
- KPI tile: Draft Orders count (when drafts exist).
- Draft Sales Orders list with customer, date, and amount.
- Recent activity for sales and customers.
- Quick Actions: New Sales Order, Add Customer.

What you can do

- Add new customers (name, phone, city, state, credit limit).
- Edit customer details (phone is locked after creation).
- Create new sales orders with line items — saved as DRAFT.
- Track order status; download invoice PDF once Accountant confirms.
- Browse product catalogue (read-only) for order line items.

What you cannot do

- Confirm & Invoice — button hidden; only Accountant/Manager can confirm.
- Payments, Manufacturing, Inventory, Delivery — no access.
- Users & Roles and product add/edit — no access.

Typical daily workflow

1. Add or find customer in Customers module.
2. Create sales order with products and quantities (status: DRAFT).
3. Inform Accountant that order is ready for confirmation.
4. Track status on dashboard; download PDF after invoice is generated.

5. Quick Reference — Actions by Screen

Screen	Main actions	Who can access
Dashboard	View KPIs, My Tasks, charts, alerts (content filtered by role)	All roles
Manufacturing	View batches · New Production Entry	Owner, Manager, Warehouse
Inventory	View stock · Stock Adjustment	Owner, Manager, Warehouse
Delivery	View challans · New Challan · Dispatch · Mark Delivered	Owner, Manager, Warehouse
Sales & Billing	View orders/invoices · New Order · Confirm & Invoice · Download PDF	Owner, Manager, Accountant, Sales (no confirm for Sales)
Customers	View · Add · Edit customer	Owner, Manager, Accountant, Sales
Payments	View history · Outstanding · Record Payment	Owner, Manager, Accountant
Products	View catalogue · Add/Edit product	View: all with access · Add/ Edit: Owner, Manager
Users & Roles	View users · Add user · Manage roles	Owner only

Support & next steps

- Use the credentials above to log in and walk through each role.
- Follow Section 4 business flow to test a complete order lifecycle.
- Contact your implementation team for production URL and live training.
